WORK EXPERIENCE

Harper Web Services LLC.
Partner / Full Stack Developer

Auburn, AL
November 2025 — Current

- Source and work with clients in the local Auburn - Opelika Area to bring their web application visions to life.
- Design and implement custom web application features including but not limited to: custom dashboard design, payment integration via Plaid and Stripe, Secure data transfer and storage, JWT authorization and authentication, and AI integration.

The McCrary Institute
Cyber Security Intern

Auburn, AL
August 2023 — March 2024

- Implemented structured data organization and regular updates to optimize and maintain an outdated and disorganized Senior Fellow database, resulting in enhanced stakeholder communication.
- Thoroughly conducted in-depth research and delivered actionable reports regarding emerging cyber threats to key energy and communications infrastructure.

A+ Landscape
Landscape / Irrigation Technician

Auburn, AL
May 2021 — August 2023

- Effectively managed a diverse portfolio of private and commercial clients, delivering professional landscape and irrigation services, resulting in client satisfaction and repeat business.
- Led on-site teams in executing complex projects, involving heavy machinery and equipment, while adhering to safety standards.

- Designed, installed, and programmed irrigation systems tailored to diverse client requirements. Enhancing water efficiency and landscape sustainability for variable environmental needs.

TECHNICAL SKILLS

Full Stack Development

- Experienced in building Node.js / Express backends and REST APIs with React frontends to meet custom application requirements. Familiar with, JWT authentication and authorization standards, Vercel deployment environments, and utilizing Docker containers.

Web 3 Development

- Familiar with Solidity smart contracts, standard security practices, NFTs, IPFS data storage, and writing / querying blockchain transactions on EVM chains, mostly on the Hedera Hashgraph network.

Data Manipulation / Visualization

- Skilled in R and Python, leveraging libraries such as pandas and NumPy, and ggplot2 for data cleaning, statistical analysis, predictive modeling, and visualization to derive actionable insights from diverse datasets. Familiar with creating custom dashboards using Tableau.

Database Design / Management

- Experienced in PostgreSQL and MongoDB for designing robust relational schemas, optimizing complex queries, and managing scaled databases to ensure data integrity, security, and efficient data retrieval.

CERTIFICATIONS

- Attendance Hashgraph Developer – The Hashgraph Association
- Microsoft Excel Expert
